

24/7

That's when you need electricity - around the clock.

Nuclear Power is reliable. While solar- and wind-powered generation should be a part of our country's overall energy strategy, you need electricity around the clock, not just when the sun is shining or the wind is blowing. Nuclear power is one of the most reliable ways to provide large numbers of customers with a continuous supply of electricity. That's another reason nuclear power is an essential part of the mix for fueling South Carolina's energy needs. To learn more about why SCE&G and Santee Cooper have teamed up to build two nuclear generating plants to meet the energy needs of our customers, visit www.scnuclear.com.
