

# \$4 Billion

Savings to SCE&G's customers.

**Nuclear Power** is an essential part of the mix for fueling South Carolina's energy needs.

Recognizing its critical role, the South Carolina General Assembly enacted the Base Load Review Act, allowing for timely, incremental recovery of prudently incurred expenses associated with construction of new nuclear plants in our state. The law also provides a simplified process for adjusting rates to allow for recovery of financing costs while new nuclear construction is in progress. Ultimately, this will save our customers an estimated \$4 billion. To learn more about why SCE&G and Santee Cooper have teamed up to build two nuclear generating plants to meet the energy needs of our customers, visit [www.scnuclear.com](http://www.scnuclear.com).
