

[Actual Size]

Nuclear Power is efficient. A single pellet of nuclear fuel, about the size of a pencil eraser, can produce as much electricity as a ton of coal, or 17,000 cubic feet of gas. That's another reason nuclear power is an essential part of the mix for fueling South Carolina's energy needs. To learn more about why SCE&G and Santee Cooper have teamed up to build two nuclear generating plants to meet the energy needs of our customers, visit www.scnuclear.com.
